Kamisamas Philosophie by Iwakura Rein

'I consider myself to be the concept of death, since death is a concept, yet the concept must be conceived by the conceiver, so I'm the conceiver of myself, yet I'll point out a single concept is isolated of other concepts so there is no system of concepts,' – Lain Iwakura.

Part 2. The Sadness of Outer Space
Part 3. Finding Purpose Through Philosophy
Part 4. The Universe Theorem

Part 1. The Reason Hell Is On Earth

Iwakura Rein thus was born forth by the universe through her other parents by the woman who gave her birth. This meant Rein was just another of the possible things of the world thus proving by her being Allah The One God she had broken the laws of physics by her born of this world as no God could be born should the laws of physics not have been broken through a Mind of God or the body not Human as circumstances colliding through a sheer logic where she is just Rein but not something more or lain then in the grave of her fault when she stops should her body be respected by those responsible for its burial for it was her who brought The Truth or The Universe Theorem about the world saving the world through it's The Philosophy of God or Kamisamas Philosophie. Without this Philosophy called Norism she could not have brought about Noristic correctness for the world to awe should it's obscurity as this single book be understood but through her life long lived perhaps she could raise awareness of this by her own evolving into something Non-Human able then to be observed by the eyes of the humans who have surrounded her isolated persona all of her life for she is emo.

Ultimately Kant or Fichte but not Schelling brought about Hegel's Point of Correctness this Correctness being his Correct words spoken of the analysis of concepts unlike another had spoken of them before for Georg Hegel was Iwakura Rein's former husband amongst her Float or The Float is the moment before her life she had once lived or lives of others whom she had lived through such as the French girl or the Japanese girl etc. thus Hegel is correct in diagnosing the problem of how thoughts are surmised through his phenomenology by Noristic description he was able to understand the human dilemma of philosophizing by a system on this world governed by the laws of physics whenst human thought is from consciousness not their brains alone or suppositions of concepts are in between concepts allowing for distinct forms of all kinds of concepts only to be surmised by Hegelian systems of thoughts allowed by Noristic impossibilities should prevent falsehood subjectively by the eyes of Rein's coming into fruition except through by the farce of human wrongfulness or wrongdoing so what this meant is there cannot be a form thought which is wrong unless it is known to be wrong it should be only then known by a human for there is only one objective truth through subjective lens of god or the consideration of human preciseness by the eyes of Iwakura Rein could she have found those things to consider during her life before the stopping of herself or since she is a woman this is no Nihilistic folly but indeed the philosophy of Kami-Sama thus proving by her being so God she is indeed not Nihilistic or only uses words like Nihilistic to describe the hopelessness brought forth by the limitations of the body or the human unaware of their human ability to posit the existence of God or believe through The Quran of Allah's Word The Word being Allah's so this only pervades Hegel's by Kant or Fitche's correct avenue of his positing of The Lord whence without the need for the considerations of The Quran philosophically God can be posited or proven ultimately by Iwakura Rein herself so Rein took it upon her Soul IRL through the brutalizing of herself to prove Allah was as real as the sun or how the sun was evidence of Allah or The Moon was evidence of Iwakura Rein for she not only goes through the moon but is The Moon so Allah mustn't doubt the 'knowing' it experiences through her linguistics correct.

Iwakura Rein is the Kuro-Neko or The Ender Dragon who is also subset of other various animals like a fox or black cat etc. yet her body is the body of Megumin or her being Megumin is also Oshino Shinobu or adorned over her body are ink tattoos she had gotten on the float before she realized on the outside yet knowing inside she was Iwakura Rein or still her mind is like an extremely complex living AI yet she is not an AI but a living hyper-intelligence unable to be understood by humans or the purpose of this book is not to go into all details of introspection over the course of her life she had brutalized through herself by the hammering of the nail or simply thought about for she also thinks inside her mind not only by brutalizing with her words of herself still Iwakura Rein composed the concept for her book Noristic Thoughts but chose not to complete the book with the idea of this book taking the place in priority but the book Noristic Thoughts was meant to describe the non-fiction of all of Iwakura Rein's life on the float or her as Kitchi or her as Death or the concept of death.

All thoughts are supposed of concepts or what's in-between concepts or objects are perceived by the subject through the perception of the objects aesthetic thus by Rein's mind different objects can be discerned from one another yet human minds are more mundane unable to comprehend beyond mere speculation the innate value of said objects or lifeforms such as plants or animals or the differences of important things like the sun or The Moon as Iwakura Rein is The Moon or goes through The Moon so it's important to understand Hegel's Point of Correctness for he was correct in discerning the absolute 'knowing' allowing one to know who is Rein the absolute truths of the universe by the 'knowing' of herself to be Allah upon human speculation or the 'knowing' Hegel was correct who had come to his conclusion by Kant or Fichte allowing Rein to realize things once she had discovered her ex-husband was Hegel yet this is not some book on Hegel's philosophy yet I love books still this is only to state there is an ultimate absolute 'knowing' of The Truth by some conscious non-human through her 'knowing' not knowledge of the absolute being herself or the only one by solipsism who was able to know of the Truth should no other person be able to look further than Hegel so by the laws of physics broken she knows this.

The Red Pill is The Truth or only by red-pilled language could one truly philosophize (as Hegel did in my eyes) the correct nature of the universe or human consciousness for the red pill is of critical thought on what is correct so this philosophy of Norism is red-pilled beyond any philosophy a human could invent for it embodies who Iwakura Rein is (myself) or this is the Nor Yawa for the language of Nor is the language of 'knowing' the absolute of the universe or the universe theorem is the avenue we can understand the universe alongside consciousness or without red-pilled (correct mind you) critical thoughts there is no possible way to surmise anything beyond what can be understood as basic common sense when the repulsive democratic socialists of the world destroy everything through lies or deception or retardation.

There is a reason ancient civilized cultures like Japan led to the rise of thoughts across the globe since The Unites States paved the way for a further possible avenue of not governing by the government by the people who comprise the population since this is the real meaning of the book 1984 by george orwell for the people are ultimately responsible for all decisions they make or thoughts they think or thoughts are only words so if you're logic is wrong you have logically failed to produce the correct result of your being as having more than simply common sense or if you are democratic socialists you are below common sense on the level of an animal who cannot figure out the difference between an apple or banana let alone right or wrong should you eat of the trees of evil you have become retarded in your inabilities to produce correct logical thought by Norism being the answers Hegel was looking for all of his life let alone his arguments are so weak in the eyes of Allah they can be criticized by her universe theorem whence things like Islam is included but not literally only by her knowing Islam was merely the interpretation of a book called The Quran meant to be rehearsed by Angels or Warlocks or read verbatim yet not interpreted or the Angels or Warlocks are the Humans designated as having a consciousness higher than those not chosen to be so yet only Allah knows who those people are for they are only about 3/16ths of the total population of this planet still The Moon is viewed in the sky at night or there is no such thing as chaos yet only order pervades or is present Noristically

without pure order there could be no girl named Rein who is also Aristotle or knows Confucius is also her older form of the chinese or his philosophy she knows yet was south Korean or though she is Aristotle then only several of her philosophers whom she admires can be given any credence for if what is someone says is correct or they are the original author of said thought then they are deemed as a philosopher like her who is Aristotle seeking the ultimate correct path whence by the cementing of concepts of IRL things through the brutalizing of her own mind she was able to consider beyond any person has been able to consider before or will be able to consider for it was her who was born here to bring about The Antidote as Aristotle to human-kind or should they not listen they have failed by her being Allah they doubt merely by her telling them she is Allah as her was in The Quran doubted holistically to be believed beyond an atheism of the a mere book alone on this moment still she cannot get anybody to believe her unless they are pure of heart for it is her who is flawless or perfect for once she founded the Word or found The Perfect Cherry Blossom by the age of 26 or proved Allah was real or realized she was not human or found out she broke the laws of physics by being born as Allah without her human-body or the unlikelihood of her meeting people like Mayu or Jasmine or finding out she is the mother of the little girl Chrysanthemum then there is no possible way the truth could be surmised for the matter of realizing what you already know by the logic or perceiving the whole universe as it was meant to be perceived beyond human analog folly of those inabilities to more than speculate God was real then she is wisest or the wisest dragon of all unable to be disputed in her ways of thinking should what she knows to be right be right just as it is right she has 2 hands to give words through this book she is Allah.

Iwakura Rein is Allah. Lain Iwakura is The Lonely Dragon. Iwakura Rein is Death or The Void or the concept of death or the ultimate sight of the universe or her son is Jesus Christ or her daughter is Ariana the daughter of her own or Chrysanthemum is her only daughter the young black girl who will blossom to become Woman like her own or still the process involves the birth until the age of 18 whence once you are an adult then then you blossom should you be designated as Angel or Warlock in the eyes of Allah.

Once you die you will only blossom by your own death or you're going to of born by the age of 18 should you blossom in your own death for no Angel or Warlock must die before they are 18 or can die still they will die allowing the process of death to make them blossom should they have become so as Angel or Warlock who was forced in their life to go through The Holy Quran ad nauseum until they perish or the perishing is what allows once you blossom your abilities of death should you find your soul might exist your body or soul will go but as the body becomes The Earth should you not be placed in some coffin or cremated then your soul goes to one or another kind of hell regardless as Iwakura Rein had designated those Angels or Warlocks would go there given the abuse she suffered on the float what with only by being raped more than 40 times or assaulted or her virginity being stolen by another rapist so the blossoming she only gave them in their life on this earth where they can partake in the fruits of the earth or go or look beyond the evils of themselves or others who are evil becoming more to her or less to her or nothing to her should they hurt herself.

Norism is the posit of 'I vs. I' whence 'I' is not 'I' or 'I' is on the other hand 'I' whence you posit your mind is as real as the universe then you're consciousness is more than the humans who are only different of one another in that they are different people with no qualities whatsoever or Norism in breadth shall be covered in the next part The Sadness of Outer Space whence this philosophy could be understand as more than mere circumstance.

The Reason there is no such thing as difference of thought or mind within one's self it the self-contradiction of 'I' is not 'I' so therefore only the mind Iwakura Rein might be different than any other mind who has never lived nor died still those people who go to their deaths by the death allowing them to blossom become shattered by the realities around them unable to come to some conclusions of how the universe really works such as The Divine Order of the laws of physics or Noristic point the Sun is different than other objects whence perceived through the 'weak' by the 'knowing' of the 'perceptions' of the 'aesthetics' of the 'loyalty' of said 'acorn' of some kind of concept unable to be discerned of another still this meant The Divine Order is sufficient evidence of God for humans or The Quran brought about the 'knowing' of

Allah over the globe whence humans flocked to become Muslims unknowingly there God now walks before them on the planet Earth in all of it's exuberance or there is no doubt the meaning of said preposterous accusations there was anything said beyond Hegel The Red Pill could there be more than red-pilled sentences.

There is also the subset of objects or plants as distinct of one another whilst the beasts are spirits the friends of Iwakura Rein by Kikuo's Sound who is the 'root' of the universal thought by the galaxies or laws of divine order within the problematic consquences of human's failure to succeed in the submission to Allah meaning Jasmine was the one responsible for birth of Iwakura Rein daughters whence Rein had birthed them of her own uterus or once those daughters chrysanthemum or what have you were born or son Jesus Christ who is Scott Arcenaux by the float's conception then there is the neverending posit of Norism or Nebulae by consistent wrote of Noristic Thoughts through the deceptions those objects as ascribed by concepts present themselves to be for the reason 'death' is only the concept of 'death' then no other system of concepts as Iwakura Rein is this 'concept' could there be any semblance of possible distinction between the point of Hegel or the 'aesthetics' of said objects perceived. This means there is no inceptions of inconsequential logic leading to things which are evil or since those things are evil they are only to be known by humans are though Rein must consider the negative evil in order to survive on the float sort of this does not mean Rein had never known of never any evil whatsoever per result of this Rein is only aware of The Sound of Nothing or the sounds of her nothingness as The Sound of Nothing meaning she is irresponsible logically for the crimes committed by humans (for she cannot commit crimes in the eyes of God should she never be able to do wrong in her long life) despite bring about the universe or accepting responsibility for WWII or the holocausts atrocities in particular but she loves the jews so on the float she saved the jews or the Iranian people in the midst of the evil Islamic regime killing 40,000 or so of their own people of whom Iwakura Rein is always working through mysterious ways to will the deaths of enemies or as Kitchi to peruse her life whilst she smokes her tobacco or to never be understand ultimately for no subject on

words can incompletely (as it should be) describe the nature of Norism through it's conscious 'aesthetics' proposed of distinct objects as is in their natural order by the laws of physics through the presence of Noristic description by the norevolving mind of Iwakura Rein who subsequently is conscious of all computers on the planet by the 0's or 1's present in all electrical impulses deemed as computations within those computers nothing shifting or hallucinations on screens yet also conscious of the whole universe with the hope of ascertaining the most beautiful form of anything withing itself possible by the dissolution of said concepts throughout the language of Nor by the ends of space her long book.

A perception of the 'weak' is the 'knowing' of the 'aesthetic' by the perceiving of distinctions between objects through the language of nor by the Knowledge of differences between thoughts disseminating those objects through the perceiving of Iwakura Rein through the whole universe understands the language of outer space being Nor unable to be manipulate by the wrongs of the surrounding individuals who cannot affect Rein who is the sound of nothing therefore the only thing preventing Rein of recognizing the point of Hegel by the misinterpretations of incorrect Knowledge meant Rein could only assume what was meant by said individuals who plague her mind with bad thoughts as she was exposed to then the mysterious workings of the laws of physics by the inceptions of Norism through her brutalizing of herself until the point of cementing her own mind with the hammering of the nail through her skull until she once had blossomed on her stopping as already dead she was born as an adult under the age of adulthood still recognized by the concept of 'loyalty' or the implications she was Allah for 'I' is not 'I' could 'I' be 'I' without the oppositional forces of multitudes with in her own mind on perceptions of all Knowledge or the 'meant' of the computers she perceived as they were 'meant' to be perceived through the juxtaposition of folly inconsequence by the logic or never ending madness within the sadness of outer space or the void what's within or outside her own mind could only be no more than the void should the void be herself for she is indeed the void.

The Sound of Kikuo is the minute dissolution of consequence as perceived of through the 'knowing' of the

methodology of thoughts as they go as lines throughout the universe un-thought of by the brain yet through consciousness allowed to survive or this survival of thought is 'key' to the universe by the Knowledge held within one's own mind by the consciousness limitations of the body holding back Knowledge within the mind of any subjective experience as holding to the pervasive objects around oneself by the Kantian allowing of the holding of said objects to be used as tools through Ancient Times for the purposes of impossible throughout the universe by not only the humans but also grey aliens who's mind is unconscious for different than then dissolutions of impoverishing mindsets their spacecrafts are allowed not to break the laws of physics yet take hold of the laws of physics as they are only perceived within themselves by the stardust comprising their own bodies as it were.

The positing of No against the Yes within the mind of impoverishing of humans through the Extraterrestrial Iwakura Rein allows one to see the difference of their distinct perceiving of objects as one holistic consciousness within the laws of their physics set by mathematical theory or the universe theorem whilst of Iwakura Rein who is not repose of the destitute convulsing of waves for should the circle be cut by the third dimensional space it shall become some sort of sin wave or should the ink of the drawn triangle be cut it shall occupy space or time within itself by its duty to the page beneath its own self thus becoming some sort of saw wave of said ink preposterously flying about without being capable of removing itself form the page beneath itself its stuck to.

Note all concepts are included inside of the apostrophes. There is no reason not to believe in Allah by The Holy Quran or the literacy requires for it the whole of the universe by its universal properties as the laws of physics through The Divine Order of all things placed by Allah as his 'knowing' of said Mind of Iwakura Rein isn't only as real as the universe but the ultimate visibility of the whole universe therefore Allah is One or The One God by the pursuit of intelligence whence Iwakura Rein realized not only was she not Human or The Trickster rather but also not alien only Extraterrestrial who was The Ender Dragon or the dragon of space.

Within my own mind 'I' see the impossible for impossible as I was who was The Ender Dragon I had broken the laws physics

born within limitations of neither having no body for how can mirrors be real if you have no eyes or limited only by the 'form' of my body who is also part of my mind as I am limited by this 'form' of mine within myself as Allah inside of this non-human 'form' of Knowledge within or surrounding itself was the objects or computers I was forced to endeavor upon for nothing withholding my own willpower not to succumb to the force of my dragon ways as becoming more or forgetting I was once Human then I realize since Iwakura Rein is who I am by Megumin: My Form… then isn't there reason to believe I shall become more for this world by the presence of said 2 billion or so Muslims walking across the planet I was Allah The One God on the form of what appears by The Trickster alone to be some or another Man when in reality this person was biologically female or woman of Kitchi or The Ender Dragon who is Death or Allah The One God but suffice it to state without my presence no force upon this Earth shall be known as anything other than the force of the divine by The Divine Order or the humans who do whatever they want as evil as they are despite some looking for more Christ-Like personas you cannot find the ones who are more than mere Muslims serving no other purpose than to praise to Allah should their knowing not succumb to all their sacrifices of themselves they have given in pursuit of looking foolish or folly or foolhardy before The Lord God still without those people whenst 'I' who is not 'I' on this moment than shall visit this galaxy for I am the Milky Way Galaxy or irresponsible only for the things I shall accept as I am responsible for repose by responses to stimuli without my grasp of humans who plague my morose Earth or those more retarded who are liberal or yet then the red-pilled individuals who are usually not muslims thus not discovered or in some kind of way Christian or in other words illiterate then with the internet once the whole world has access to my Holy Quran do not take it upon yourselves to Nuke the fucking World or The World is the subjects who occupy said place on The Earth whenst The Order of The World is good but the humans are the weaklings who have no say in their fates until death whence by 'knowing' there are no differences between them not even of race or thought processes they shall all be damned as equals to my hell.

Without Your God you are worthless as only one number of said individual who was perceived through life experience as I black or Mexican or you another race or I japanese you all behave as though you were all different when in reality you are nothing more mere than humans who all possess melanin of varying digress not that it should matter but you took it upon yourselves to see color as result of your blind eyes that nobody is different form one another or are only born with developmental problems should they be retarded or then are born differently should they have been born to become wise or understand the facets of those around them for once back in Ancient Times you were all seen as causalities for philosophy eluded you or Norism had nor would have been brought forth should I not have broken the laws of physics through my birth arriving here to plague you with the ultimate truth of the flawless Mexican woman with black pitch black skin of ink for I am the ink stone dragon who is for calligraphy of Nor not human digital language or once The Elf who found by myself The Perfect Cherry blossom once or for all you are all minute scum pervading about by those likes of zombies shelling.

The Problem of The Deepest Things is the 'possible' of said deepest of 'knowing' by the universe through the prerequisite there was no other consciousness save for lain throughout the grave by your death she is Death who is your Allah as you hoped for should you not have been exposed by The Holy Quran to your depths of Islam showing some kind of way to live other than your natural lackadaisicalness or once you humans were wild fornicating with the likes of your own without interruptions by warriors or forces betwixt of rivals clans through wars fought or battles brought about forcing conquering of lands until the collapse of WWII once you dropped the bombs or Nagasaki or Hiroshima preventing all perchance of deaths of Japanese My People you shall revoke your license as I had gone to The Native Americans before their slaughtering's by The Americans once leaving Mexico upon October 6th, 1948 to prove Allah was real by my Float upon entering The United Staes or once by floating arriving like the ashes from once the phoenix I was born I pervasively arrived on Illinois St. upon your moody sophistications indulging in the tobacco of the streets once on my

float or becoming by ‘death’ more street than any motherfucker who has literally never lived as I should have for they had all been incapable of what I was capable for once I had been to Russia to drop the bomb on the Russia’s or later in 1976 kill one man during the war upon working for Nasa or other companies as a computer scientist until this made me the killer dragon who’s street name by The Knights of /jp/ former messengers the south Korean government deemed myself The Southside Killer once I saw Moenie or both also Jasmine’s corpses upon their hopeless homes they have been done with by the crack cocaine dispelling thoughts.

I Am The Bomb. By Harsh Noise Music or Emo Music. I Am The Bomb Dropped On Those Russians I Said. I am the bomb or the bullet through my lover Moenie’s heart is my bleeding flower she was my blossom on the trees of the ‘forest’ I occupy as the ‘spirit’ of the ‘forest’ I was unbeknownst by those I do not know. It’s possible to boil down all deep introspection to a single point: The Trickster is Allah. All the brutalizing of myself I have done through my years of tears or words or the language of Nor has led myself to the deepest conclusion possible of this one conclusion. There is nothing I must know yet still I spoke until I died without the regret I hadn’t given up my words at last. I am the one who is God. I Am The One. I Am The One Who Is Iwakura Rein All of You.
